# Sapa Decorative profiles

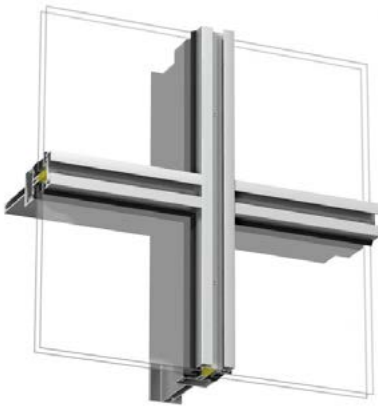

Add, Expressive and Optima design facade glass holders

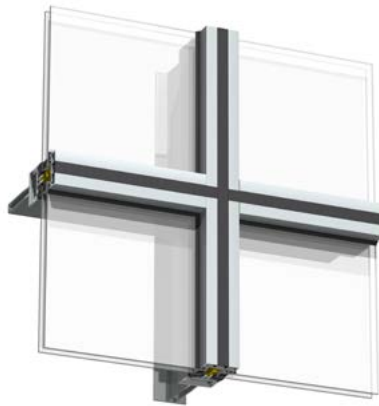

# Add

Add is a flexible mounting system for attaching solar shades, lightning conductors, downpipes, gutters, signs, lighting etc. Add profiles can also be combined with profiles from the Expressive decorative range. The profile's distinctive channel lets you outline each glazing unit and create a picture frame effect.

## Exterior decorative profiles for 4150 and 4150 SX.

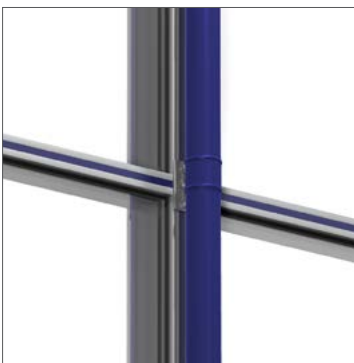

*Add base decorative profile 42693. Countersunk screws.*

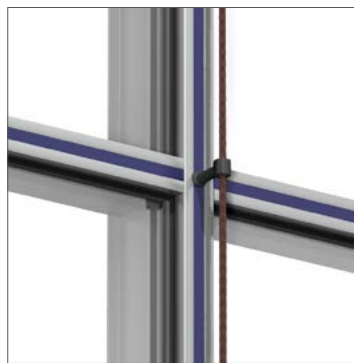

*Add base decorative profile 42697 with colour profile to accentuate framing and linearity of facade.*

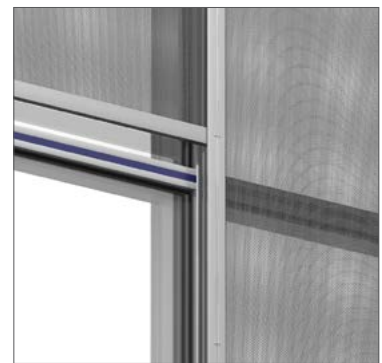

*Add base decorative profile 42693 with mitred connection between horizontal and vertical profiles to create a picture frame effect.*

*Add 42693 permits attachment of downpipes and gutters using dedicated supports.*

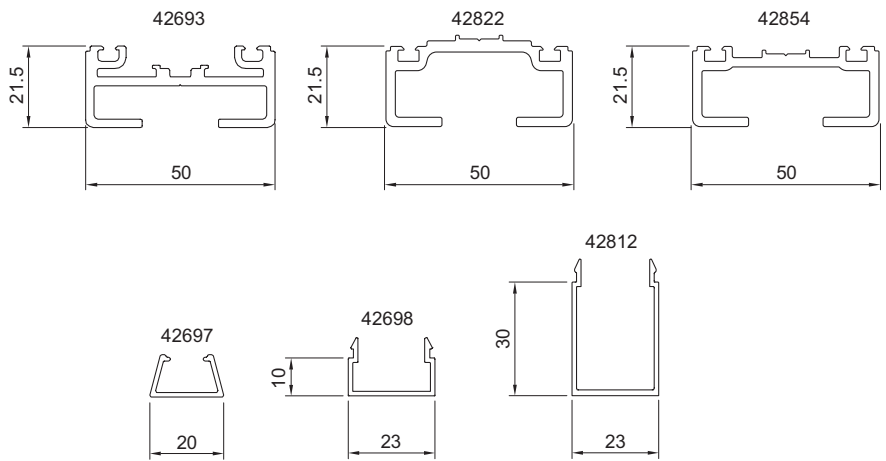

*Add 42693 permits attachment of a lightning conductor using a simple and versatile support.*

*Add 42693 permits attachment of solar shades and solar screens using dedicated supports, see section on Solar Shading.*

Profile overview, Add exterior decorative profiles for 4150 and 4150 SX

# Expressive

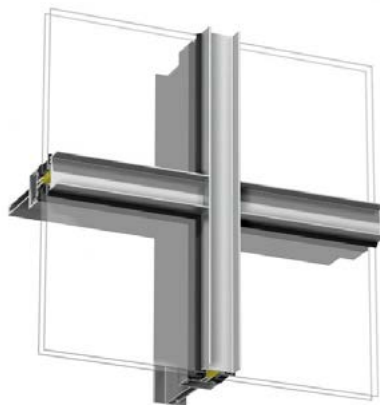

Expressive gives architects the freedom to play with light and shadow effects on the facade. Accentuate the linearity of the facade, highlight areas and elements, use different combinations of colour and finish.

Expressive decorative profiles can also be combined with profiles from the Add and Optima decorative ranges. Profiles can also be created to your own design if desired.

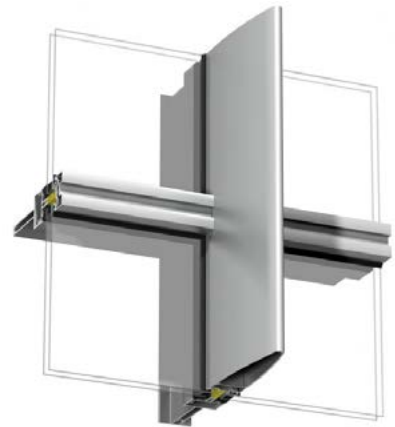

## Exterior decorative profiles for 4150 and 4150 SX.

*Expressive decorative profiles, 42694 horizontally, combined with 42227 vertically.*

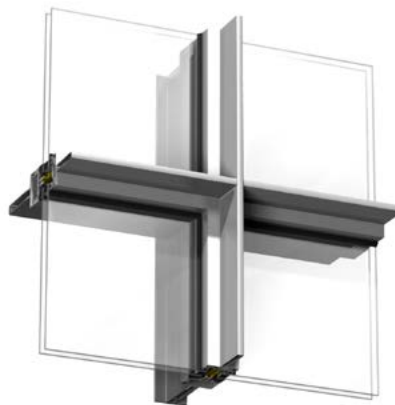

*Expressive decorative profiles 42678.*

*Expressive decorative profiles, 42693 horizontally, combined with 68823 vertically.*

*Expressive decorative profiles, 42813 horizontally, combined with 42811 vertically.*

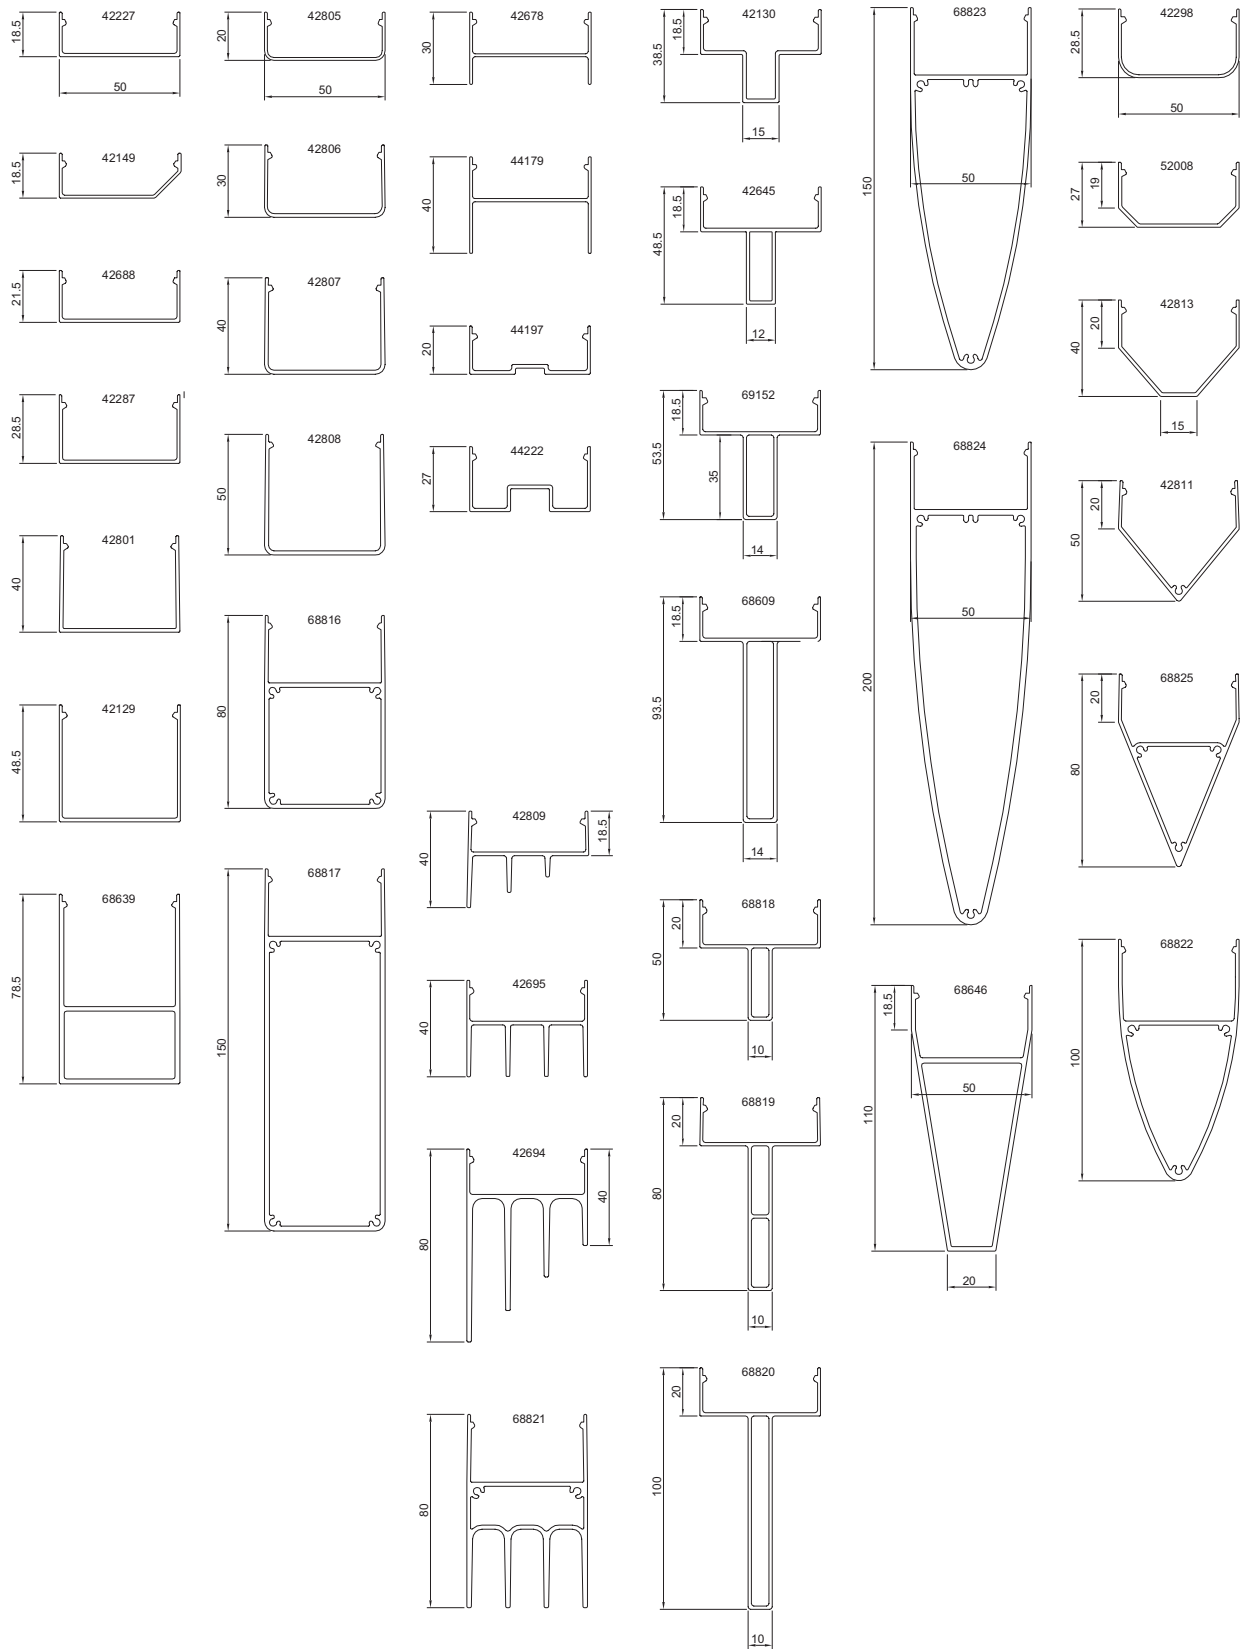

*Expressive decorative profiles 68819, combined horizontally and vertically.*

*Expressive decorative profiles 68822, combined with 42227 vertically.*

Profile overview, Expressive exterior decorative profiles for 4150 and 4150 SX

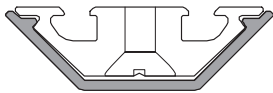

# Optima

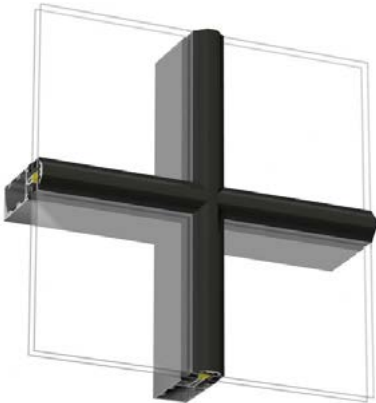

Optima offers a choice of design possibilities with exposed or concealed fixing. A black finish is a popular option with the decorative profiles, which are only 32 mm wide.

Optima decorative profiles can also be combined to advantage with Expressive profiles. Profiles can also be created to your own design if desired.

Exterior decorative profiles for 5050 SG and 4150 vertically.

*Optima 42844/42845 have concealed fixing.*

*Optima 42844/42845. Concealed fixing. Powder coated black.*

*Optima 42651 horizontally, combined with 42653 vertically, fixed with exposed screws in stainless steel or black oxide finish, c/c 200 mm.*

*Optima 42844/42845 with concealed fixing horizontally, combined with Expressive 68821 vertically.*

*Optima 42844/42845 vertically, combined with Expressive 68823 horizontally.*

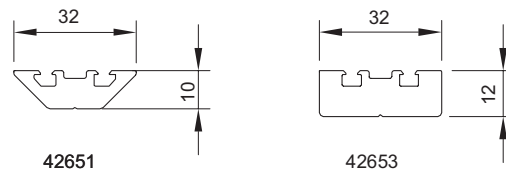

*Optima 42653 horizontally and vertically, fixed with exposed screws in stainless steel or black oxide finish, c/c 200 mm.*
